In the first half of 2010, the six county Chicago region again saw considerable growth in the number of new foreclosure filings when compared to the same period last year. The trends illustrated in the attached fact sheet demonstrate similar patterns to those observed in recent quarters. In the first half of 2010 the largest increases in new foreclosure filings occurred in the region's middle- and higher-income communities, while communities of color hardest hit by the foreclosure crisis continued to see declines in the number of new filings.

The vast majority of regional foreclosure filings are on single-family properties, but condominiums make up a substantial, and in some cases growing, share of overall foreclosure activity. In the first half of 2010 in the Chicago region, 72 percent of all filings were on single-family homes, 9 percent were on multi-family properties, and 19 percent were on condominium units. Figure 3 shows the percent share of total foreclosure filings on condominium units in the first half of 2009 and the first half of 2010. In the first half of 2010, there was a 2 percentage point increase in the share of total filings on condominium units in the region, from 17 percent in the first half of 2009 to 19 percent in the first half of 2010. Outside of Cook County, the share of total foreclosures that were on condominiums remained fairly flat between the first halves of 2009 and 2010. In DuPage County, 22 percent of foreclosure filing activity was on condominium units in the first half of 2010, a slight decline from the first half of 2009. There was also a slight decline observed in Lake County, and share growth was flat or nearly flat in Kane, McHenry and Will Counties.

However, foreclosures on condominium units represent an increasingly large share of new foreclosure filing activity in Suburban Cook County. While the City of Chicago had the largest number of foreclosure filings on condominium units in the first half of 2010, foreclosure filings on condominium units in North and Northwest Cook County grew at a much more rapid rate (77 and 76 percent increases, respectively) than in the City of Chicago (38 percent). In the first half of 2010, 30 percent of all foreclosure filings in North Cook County were on condominiums, compared to a 22 percent share of total filings in the first half of 2009. Similarly, 44 percent of foreclosure filings in Northwest Cook County were on condominium units, compared to 39 percent in the first half of 2009.

Closer analysis within these subregions shows that many of the new condominium foreclosures may be extremely concentrated geographically in large suburban developments. In Northwest Cook, for example, foreclosure filings on 98 condominium units in a single development represented seven percent of the total condominium filings in the subregion in the first half of 2010. Municipalities with the largest number and concentration of condominium foreclosures include Palatine, Schaumburg, Hoffman Estates, Wheeling, and Arlington Heights.

Figure 3. Six County and Cook County Subregions Share of Foreclosure Filings on Condominium Units, 1H09 and 1H10
